

AIR BRAKE SUZI COILS

Made from SAE J844 Compliant Tubing

FEATURES & BENEFITS

Esdan air brake coils are SAE J844 complaint nylon tubing that is helically coiled to give a desired working length. They can be retracted to a very short length and stored out of the way when not in use. They are designed for the transfer of air between the prime mover and semi-trailer.

Available as individual coils or pairs with or without fittings.

Packed in polythene bags.
